

Welcomes you to the Inaugural

User Group Meetings for Genetic Analysis and Real-time PCR

Tuesday 16th October, 2001

Tuesday 16th October - Seminar Room, Room 228, Department of Biochemistry

9.00a.m. Genetic Analysis User Group Meeting

Some topics to be discussed include:

- Troubleshooting of common Sequencing problems
- Various methods of sample preparation, clean up, template concentration
- Update on what's new from AB: Information on BigDye V3, the 5th Dye for GeneScan, 3100 Genetic Analyser, SeqScape and GeneMapper.....

12 noon Break for Lunch

1.30pm Seminar - New Technology For Real-time PCR, SNP Analysis & Sample Prep

-presentation by Dr Brant Bassam, Product Manager for PCR and Sequence Detection Systems, Applied Biosystems, Australasia

2.45pm 7700 User Group Meeting

Some topics to be discussed include:

- Multiplexing on the 7700 and housekeeping genes
- Absolute versus relative quantitation
- Primer express and Assay Design
- Update on what's new from AB: Information on new Master Mixes, sample size PDAR's, PrepMan Ultra, MGB chemistry.....

5.00pm Come and join us at the University Staff Club for refreshments and nibbles

Wednesday 17th October - Application Assistance

9.00-5.00pm Andrew Masel, Brant Bassam and Stacey Nelson will be available all day to meet with anyone wanting any applications assistance with DNA Sequencing, Real-time PCR, TaqMan/SYBR Assay designs etc. If you wish to book a time to meet one-on-one for any query please contact Stacey Nelson on (09) 536-4070 or via email on nelsonse@appliedbiosystems.com
